Geography The Pike River rises in West Point and flows generally westwardly to a headwater basin along the northern boundary of Chattahoochee National Forest. The river is also bordered by Big Canoe State Park. The lower portions of the river passes through the suburbs of Atlanta and Roswell, and is also used as a power source for hydroelectric generation. Near the mouth of the river, the Chattahoochee flows into the Altamaha River, which flows into the Atlantic Ocean. Pike Lake The name of the lake is a misnomer, because the lake is actually located several miles to the north of the river. The "Pike Lake" is actually part of the headwaters of the Chattahoochee River, which is in a separate basin. The lake is actually located between the Altamaha River and the Flint River, and is surrounded by the towns of East Point and East Point Mall. The lake is also the site of the Hillsborough Reservoir, which diverts flow from the Chattahoochee into the Savannah River. The Hillsborough Dam is located between the Pike Lake and the main river. Crossings The following crossings are at designated locations and not necessarily downstream to upstream. See also List of dams and reservoirs in Georgia Pike Lake (Chattahoochee River tributary)
